# Evod vaporizer pen manual

Evod vape pen manual pdf. Evod vape pen settings. Evod vape pen manual.

Features: 100% brand new and high quality No tar and other cancer causing substances No second-hand smoke, environmental protection No cigarette smell stink up your clothes, house, or car No-leaking problem Huge vaporParameter: Material: Metal Color: Silver/Green/Pink/Purple/ Red/Blue/White/Blac/Yellow/ stainless steel (Optional) Size: 1.3×15cm Battery: 1100mAh Voltage: 3.7V Atomizer capacity: 1.6ml Screw thread: 510 Screw threadPackage include: 1 X Atomizer For EVOD MT3 1 X Battery 1 X USB Charger CableEVOD Vape Pen InstructionsOverviewThe EVOD Vape Pen is a great try to use electronic vaporizers for the first time. The vape pen provides a fantastic experience for both new as well as experienced users. Each unique part was specially designed in order to work flawlessly with one and other, eliminating any issues regarding compatibility.Unlike other vape pens on the market, the Kangertech EVOD doesn't use any settings that must be adjusted or understood. Instead, every feature has been set in order to make sure that your specialized coil, as well as the tank and long lasting battery optimize each other, allowing for a unbeatable vaping experience upon initial use. This is perfect for new users as they need no prior knowledge of skill in order to operate the EVOD vape pen.EVOD clearomizer tanks make use of a botton coil design, specially made to ensure your wicks maintain saturation with the e-juice of your choice. Your tank holds a total of 1.6ml of the juice of your choice, ensuring you can use any of your personal favorites. They are build for simplicity, ensuring they can be easily refilled by simply unscrewing the tank from the base.If you would like to begin vaping then this product is designed for you, it provides you with a quick yet simple base to build your experience from. The AIO vape pen includes all the components already installed for use with the vape juice of your choice. It can be easily used, refilled and recharged with ease. The tank refilling involves a stress free experience, that can be quickly completed without any hassle.What's More On EVOD Vape PenSimple but Elegant DesignThe EVOD Vape Pen is one of the best-looking compact vaporizer's on the market. It is specially coated with a precision matte finish, both aesthetically appealing as well as resistant to fingerprints and smudges. Whats more, is that the pain is available in 10 various colors, providing you with a range of choices to suit your preferences.Refillable Tank With Removable Atomizer CoilsThe EVOD Clearomizer uses a polyurethane plastic tank for ease of carrying, making it both resilient and lightweight. The tank itself is surrounded by a sturdy aluminum shell for extra protection, and is specially tailored so that it matches the color of your battery. There is a see-through window on the wide of the tank itself, that allows the user to visibly see how much juice is left. This allows you to actually see the remaining juice, unlike many other options on the market.The Kangertech atomizer themselves make use of a unique coil design, with the coil being located at the bottom. This helps to guarantee that all of your wicks contain e-juice, no matter the level of liquid is still left within each tank itself. Each tank is designed for a simple refill so that they can easily be refilled by even the newest vapers. This means that you can quickly refill your tank, using any e-juice that is best suited to your preferences.Each EVOD Tank makes use of specially equipped with specialized atomizer coils. These allow for outstanding flavor as well as a nice vape cloud. Unlike many other products, the EVOD Tank uses its unique design to accommodate the use of atomizer heads that can be replaced, enabling you the ability of replacing the heads themselves, compared to the normal routine of replacing clearomizer. Making the overall process more cost-effective, as you won't have to replace your entire tank.Battery with 1100mAh For Whole Day UseThe EVOD Tank can be powered by a brand new, innovative EVOD Battery. Each shell of the battery is specially designed with a strengthened aluminum alloy, ensuring it is durable but also lightweight. The core features of the EVOD Battery make use of lithium-ion, advanced technology, a material that is significantly superior compared to traditional alkaline batteries. Each battery is colored so that it matches color of the EVOD Tanks for an all round smooth look.The Kangertech EVOD Battery has a total capacity of 1100mAh which allows for longer use between each charge. The battery has an output of 3.7V and is specially designed for optimization with the atomizer coil. This allows for smooth, satisfying hits every time it is used. The battery has been expertly modified to produce 3.7V consistently, no matter how much battery is left.For ease of use, the battery uses a connector build using the same stainless steel. This helps to ensure that there is a safe connection for both the tank and the battery, with a strong flow of electricity. In addition, the connector itself makes use of 510 threading and eGo threading. By doing this, you have the ability to make use of your EVOD Battery alongside a range of tanks, rather than being restricted to the single tank.FAQ for EVOD Vape Pen ProblemsIn order to begin using your pen, you must remove the tank from the battery connection. This can be done by turning the tank in an anti-clockwise movement from the battery. Once it is open, you will be able to see a hole down the center of the device that leads directly to the mouthpiece. You must begin placing the e-liquid of your choice around the center tube to ensure that it does not come out of the mouthpiece itself. Make sure that you do not overfill it by ensuring that the e-liquid does not come above the tube. Once this has been completed, simply flip the battery that you removed and reattach it to your tank by simply lining it up with your coil.Once you have done this, turn on your EVOD Vaporizer by using the button a total of 5 times. Then put the mouthpiece to your own mouth and pull. The vaping should begin instantly, providing you with a smooth taste of your choice.Move your tank, ensuring that your mouthpiece is facing in the direction of the floor.After you have done this, begin to unscrew the base of your pen, ensuring that this is done in a counterclockwise motion.You can then begin to fill your tank with an e-liquid of your choice. So that you can do this, let your e-juice flow down the sides of your tank. However, ensure that no e-liquid gets into the center hole. Doing so may restrict or block the airflow.Once you tank is filled, begin to place your base onto your tank again, making sure that you screw it tightly. However, also make sure that it is not screwed on too tight.Once you have finished this, ensure that there have been no leaks from your tank. After you have done this, simply reattach your tank to your battery.Begin by rotating your tank, ensuring that the mouthpiece side of the tank is facing the direction of the floor.Detach your battery from the tank itself, this can be done by unscrewing the battery in a counterclockwise direction.Remove your older atomizer coil simply by screwing it in the opposite direction. Attach your newly bought coil by attaching it back onto the base (clockwise)Add a small amount of your chosen e-juice by dripping it onto the cotton.Reattach your base onto your tank by simply screwing it back on using a clockwise manner.Now simply attach your tank to your battery and begin using.It is important that you clean your EVOD device on a regular basis, especially when you change e-juice flavors. Due to the clearomizer model, cleaning your device is both fast and simply. To begin cleaning, you have to rinse out your coil with alcohol, preferably rubbing alcohol and leave it to dry for 24 hours. This will help to remove all residue and ensures the best results when switching your flavors around. You can also quickly clean your device with a simple rinse, although this is not as effective. If your coil begins to make a gurgling sound when it is being used, this is usually because your e-juice is getting into the atomizer coil and consequently causing it to flood. This can be simply cleaned by unscrewing the battery, placing a tissue on the bottom of your atomizer and simply blowing through your mouthpiece. This helps to clear out your coil and remove any e-juice that is left. Should there be any e-juice on your battery connector, this can be wiped off using tissue to ensure maximum efficiency.Your EVOD battery can be charged from the top, on the side that you use to screw in your tank. As the EVOD is already fully assembled, you can simply unscrew it to disassemble it and begin charging. It makes use of a USB charger that is simple and easy to use with 2 obvious plugs that can be used to charge your device through any USB outlet. Simply place your charger into your battery and the USB outlet. Once it is working, the light on the battery will begin to flash, showing that your battery has begun to charge. Once the color is a solid green, your battery has been completely charged. During this process, it may flash between green and red, in which case it is not yet fully charged.
