[7] [8] When used for local anesthesia or nerve blocks, typically lidocaãna comeãÅ²ã vã¼rios working within minutes and is duraãÅ²ã Å the half-hour three hours. [8] [9] m © tambã lidocaãna mixtures can be applied directly to the skin or mucous membranes to anesthetize Åproa. [8] often used blended with a small amount of adrenaline (epinephrine) to prolong their local effects and reduce bleeding. [8] if injected intravenously, can cause brain effects such as the confusion Å. Å Changes in the Visa, dormã¼ncia, tingling and vã¼mito. [7] rush can cause low blood and the Å frequã¼ncia cardãaca irregular. [7] Hã¼ precuãpaãÅ²ãpes that inject into a Å articulaãÅ²ã may cause problems with the cartilage, [8] appears to be generally safe to use in pregnancy. [7] A dose may be lower in those with hepã¼ticos Required problems. [7] In general, Å © safe for use in people Åã rã¼gicas the tetracaãna or benzocaãna. [8] A © lidocaãna an anti-arrãtmico type of class Ib. [7] This means that works by blocking sã¼dio channels and, therefore, decreasing the rate of contraãÅ²ãpes corããÅ²ã the Å. [7] When injected near nerves, the nerves in the Å can lead to signs or CA © rebro. [8] Lidocaãna was discovered in 1946 and comeãÅ²ou to be sold in 1948. [10] Å in the essential drug list of the World Å OrganizaãÅ²ã Health. [11] is available as a medicaãÅ²ã the Generic Å © rich. [8] [12] In 2018, it was 233ã² most commonly prescribed drug in the United States, with more than 2 millions of prescriãÅ²ãpes. [13] [14] utilizaãÅ²ãpes mã © © site tips anestã© agent sodium efcã¼cia The profile lidocaãna as sodium anestã© site © Å © characterized by a Fast Ignatius acãÅ²ã Å o Å the duraãÅ²ã © interna day efcã¼cia. Therefore, lidocaãna Å © Å infiltraãÅ²ã suitable for the block and shallow anesthesia. TRENDS SUBSTA © Å acãÅ²ã of the longer such as the Å bupivacaãna is sometimes given For spinal epidural anesthetics and; Lidocaine, however, has the advantage of a fast nonception. Adrenaline vasoconstricts arthers, reducing bleeding and also delaying the of lidocaãna, almost doubling the durability of anesthesia. Lidocaãna is one of the most used local anesthetics in dentistry. It can be administered from various ways, most often as a nerve or infiltration block, depending on the type of treatment performed and the work area worked. [15] For superfect anesthesia, several formulations can be used for endoscopy, before intubation, etc. Tampon the lidocaan pH makes local anesthesia is less painful. [16] Lidocaãna drops can be used over the eyes for short ophthalmologic procedures. There is experimental evidence for the topical lidocaan for neuropathic pain and pain at the donor skin graft site. [17] [18] As a local anesthetic agent, it is used for the treatment of early ejaculation. [19] An adhesive transderman pension containing a concentration of 5% lidocaãna in a hydrogel bandage, is approved by the United States FDA to reduce the pains in the nerve-caused a ©
