Once the installation is complete, you can create a PDF of any file by clicking the Print command. Print.You can also create the application from the start. DoPDF is available for Windows 2000, 2003, XP, Vista and Windows 10. The only requirement it has is only 5 MB of free space on the hard drive. DoPDF works without any third-party tool and is malware free. Does DoPDF have a simple interface? When DoPDF accessed from the start, the simple application interface opens. This window is quite minimalist and has some functions to create PDFs. The option is "bowaes" asks you to select the file you want to convert into PDF format. After that, you just need to click on the "Creaa" to open the dialog box Settings setting and click "C" print "C" creates a PDF of any file you select. How do you use the DoPDF? As mentioned above, there are two ways that can create PDFs using the DoPDF printer. One way is to open the application, select the file you want to convert and click create. Another option is to open a document on any software, including notepad, Wordpad or Excel. You can also convert an email, a website or an image. Before clicking on print, you can also configure the size, the orientation, the resolution and other available parameters. DoPDF will ask him for the PDF to be saved before creating a PDF. As soon as the work is done, a PDF file will open automatically in the predetermined PDF viewer software of your computer. DoPDF Free Download is suitable for both personal and commercial use. It can generate multiple PDF documents in a short time. When it comes to quality, DoPDF offers three options - low, medium and full. The only inconvenience is that the application does not provide any encryption, which means that users cannot create sensitive PDF files with this software. Once installed, it will allow you to convert any type of printed documents to PDF files. doPDF is installed as a virtual PDF printer driver so after a successful installation it will appear on your printer and fax list and also on the list of all programs. Using the pdf creator you can convert to PDF in two ways: 1. Print PDF through the virtual printer driver doPDF would do this exactly as prints to a regular printer, only the result will be a PDF file, not a printed piece of paper.2. Using the DoPDF Start Window The software has an executable file (accessible from the initial program group) that can be executed to start a conversion wizard.
