## Freestyle lite glucose test strips 50 count

Keep out of the reach of children. Depending on your blood glucose monitoring system it can be used to test on your finger,hand,forearm,upper arm,calf,and thigh. Clean the site you have chosen for the test. Use warm,soapy water. Rinse and thoroughly dry. To bring fresh blood to the surface,rub the test site (except the finger) vigorously for a few seconds until you feel it getting warm. Put a strip in the meter. Most meters will turn on automatically. Power on if required. For meters that require coding,be sure that the code on the meter display screen matches the code on the test strip vial. If it does not match,see your Owner's Booklet for how to code the meter. 2. Do the Test When the prompt to apply the sample appears on the screen,use your lancing device to obtain a blood sample. Gently touch one sample application area of the test strip to the blood sample. If the strip does not fill,reapply the sample to the same area within 60 seconds. Do not apply the sample to both edges of the strip. Do not put the sample on top of the sample application area. When the strip is full,the meter will "beep" or you will see the moving lines on the display. Statements regarding dietary supplements have not been evaluated by the FDA and are not intended to diagnose, treat, cure, or prevent any disease or health condition. Freestyle Lite Test Strips make testing easier, faster, and less painful! No Coding Technology makes these Freestyle Blood Glucose Test Strips more accurate and convenient than any other test strip. Just 0.3, the world's smallest sample size, is all that is required for accurate blood glucose readings. The simplicity makes the strips suitable for users of all ages, enhancing accessibility and usability. -Provide a dependable solution offering accuracy, speed, and convenience to support daily monitoring routines. Integrating these strips into your diabetes care regimen ultimately helps to contribute towards better health outcomes and improved quality of life. Please see details of our shipping and returns policy here With this Freestyle Lite Blood Glucose Test Strips box of 50, you can test anywhere with less pain and less time! No Coding Technology makes Freestyle Lite Strips more accurate and less confusing than many other brands available today. Freestyle Test Strips support alternate site testing, so you can test from your fingertip, palm, forearm, upper arm, thigh, or calf. The meter's Coulometry system means that it is unaffected by many of the factors that can make testing problematic. Features: Expiration date guaranteed 5 months or longer from purchase No Coding Required: This makes it easier and more convenient to begin testing. Coding meters is a time-consuming and frustrating process, as any diabetic knows, without having to code your meter, you're on your way to accurate testing much more quickly. Alternate Site Testing: You can test using your fingers, forearm, upper arm, hand, thigh, calf and palm. When testing for hypoglycemia (low blood sugar) or if you have hypoglycemia unawareness, it is recommended that you use your finger only. World's Smallest Sample Size: A small sample size of just 0.3 micro-liters of blood is all that is required. Some other meters require samples of 1.0 or even 1.5 micro-liters more than triple what the FreeStyle Lite requires. Coulometry Measurement: Coulometry is a unique electrochemical measurement technique exclusive to FreeStyle. Coulometric analysis is unaffected by reaction rates and is ideal for measuring a small blood sample size. 5 Second Test Results: Accurate blood glucose results are available in merely 5 seconds. When you aren't sure what your blood-glucose levels are, time is frequently of the essence, and a few seconds faster can mean a much better outcome for an acute problem whether hyperglycemic or hypoglycemic.
