Download Pretend Update Share This Minecraft: Bedrock Edition Helper Mod. Do you think a module or command is missing on the client? The LiquidBounce JavaScript API lets you do it yourself! With just a few lines of code, you can develop modules and make them public. LiquidBounce lets you customize the HUD according to your personal needs. So if you don't like the standard design, you can easily customize it to your exact needs. We are constantly trying to improve LiquidBounce by adding new features, modules and solutions. Our goal is to develop your ideal customer absolutely free of charge. We believe quality doesn't have to be expensive, which is why we offer LiquidBounce for free. No hidden costs, no premium features. Go ahead and download the client. LiquidBounce's custom main menu has a beautiful shader background. All modules can be configured directly from ClickGui. Allows you to see ore and other valuable blocks from the ground. It will instantly destroy all the blocks around you, not by accident! Yes, LiquidBounce is safe. We can guarantee that it does not contain any viruses, advertisements, cryptocurrency mining or other unnecessary things. LiquidBounce is also open source. This means that the source code is freely available. So if we violate our laws, we will notice immediately. LiquidBounce is completely free. Still, there are several ways to monetize our business. On the one hand, this page contains banners, so if you want to support us for free, please disable your ad-blocker, on the other hand, we accept donations. LiquidBounce will notify you at launch if a new version is released. To update, download LiquidBounce again and overwrite the old file in the folder. You should install the latest version the next time you run LiquidBounce. Aristotle 1.8.9 - 1.19.
