Switch 32 x 100 Gigabit QSFP28 / 40 Gigabit QSFP+ View All FortiSwitch Data Center switches deliver a Secure, Simple, Scalable Ethernet solution with outstanding throughput, resiliency and scalability. Virtualization and cloud computing have created dense high-bandwidth Ethernet networking requirements. FortiSwitch Data Center switches meet these challenges by providing a high performance 10 GE, 40 GE or 100 GE capable switching platform, with a low Total Cost of Ownership. Ideal for Top of Rack server or firewall aggregation applications, as well as SD-Branch network core deployments, these switches are purpose-built to meet the needs of today's bandwidth intensive environments. How long will it take to fulfill my order? It can take 2 weeks or more. When you place an order with us, we first check the availability of the product(s) you requested. If the product is in stock at one of our distributors, we will order it to be delivered to you or to us to configure. If the product is not in stock, we will have to wait for the distributor to restock before we can fulfill your order. This can result in a delay of 2 weeks or more. It's important to note that we make every effort to fulfill orders as quickly as possible, but sometimes external factors beyond our control can affect the fulfillment time. If you have any questions or concerns about your order, you can reach out to our customer service for more information. Do you hold stock yourself? No, we do not hold our own stock. We order from our distributors. We do not hold our own stock. Instead, we order products from our distributors when a customer places an order. This allows us to offer a wide range of products to complement our networking and cybersecurity services and solutions. Because we rely on distributors to supply the products we sell, it can sometimes take longer to fulfill orders if a product is out of stock. However, we work with multiple distributors to ensure we can offer a variety of products to our customers. How do I contact your customer service? You can get in touch with us via email at store@axians.co.uk or hello@axians.co.uk. If you have any questions or concerns about your order, you can contact our customer service team via email at store@axians.co.uk or hello@axians.co.uk. These email addresses are monitored regularly, and a customer service representative will respond as quickly as possible. You can use these email addresses to inquire about the status of your order, ask questions about products, or request assistance with returns or exchanges. We are committed to providing excellent customer service and will do everything we can to ensure your satisfaction. Extreme Network Throughput: 32 x 100 GE QSFP28 ports for high-volume, high-speed data transmission. Robust Power Redundancy: Dual AC power supplies ensure uninterrupted service and operational reliability. FortiGate Compatibility: Streamlines network management and security through integration with FortiGate controllers. Designed for Large Networks: Ideal for data centers and large enterprises needing extensive bandwidth and connectivity. Layer 2/3 Capability: Supports advanced network configurations and traffic management for optimized performance. FortiSwitch Data Center Switches FortiSwitch Data Center switches deliver a Secure, Simple, Scalable Ethernet solution with outstanding throughput, resiliency and scalability. Virtualization and cloud computing have created dense high-bandwidth Ethernet networking requirements. FortiSwitch Data Center switches meet these challenges by providing a high performance 10 GE, 40 GE or 100 GE capable switching platform, with a low Total Cost of Ownership. Ideal for Top of Rack server or firewall aggregation applications, as well as SD-Branch network core deployments, these switches are purpose-built to meet the needs of today's bandwidth intensive environments.
