High download speed up to 200% with dFast Torrent Cloud™ Enjoy the fastest download service with dFast. Editor's review Watch your provider's IPTV on your phone, tablet, TV or set-top box. The application is only a player and does not contain preset channels. To view, you need to add a playlist and EPG of the provider. Features available: - Live streams and archives (if the playlist supports this feature); - You can add unlimited M3U playlists or Xtream Codes; - You can add unlimited XML EPG; - Support for various streams (HLS, UDP, RTMP and others); - sorting and searching; - parental control (playlist editor); - favorites; - audio track selection; - subtitle selection; - and much more... Enjoy watching! Watch your provider's IPTV on your phone, tablet, TV or set-top box. The application is only a player and does not contain preset channels. To view, you need to add a playlist and EPG of the provider. Available features: Live streams and archives (if the playlist supports it); You can add unlimited M3U playlists; You can add unlimited XML-EPG; Support for various streams (HLS, UDP, RTMP and others); Sorting and searching; Parental control (playlist editor); Choice; Selection of audio tracks; And much more - enjoy watching! WHAT'S NEW Added: - New "Recently Viewed" group; - New group settings and data deletion; - Block multiple groups; - The ability to enable parental control without a password; - The option to display the clock using the dashboard; - Ability to disable channels in Xtream Codes playlists; Greek language; Fixed: - Bugs in sound and brightness settings; Data backup errors; - Picture-in-picture on Android 12; EPG icons were not displayed; - Many other fixes and improvements. Updated January 21, 2022 App Name TV Genre Video & Music Size 8.22 MB Latest Version 1.9.2.3 Get 5.0/5 (56 votes) Download APK (8.22 MB) Check out this articleWe can find many ways to entertain ourselves all alone. One of them is to watch the shows you want. With the increase in content, viewers can find their favorite shows across a variety of genres. In doing so, they have their favorite channels or channels. Sometimes when they don't have time to watch these channels, they can use Televizo's solution - IPTV Player. This is an application that helps you play channels and videos efficiently. With Televizo, you can efficiently and quickly watch programs on your favorite channels with the touch of a button. At the same time, the number of media or sources is not limited. Therefore, users will spend a lot of time with their devices, watching their favorite channels anywhere and not necessarily in front of the TV screen. Users also need to know how to use this application. You yourself download your favorite programs for this application, but they are not available to you. In other words, it only plays videos that are relevant and meet your entertainment needs. Therefore, you need to find a way to replenish resources for this application. In fact, the programs or channels added perfectly match each user's preferences, needs or habits. From then on, the number of things added will always fluctuate. When using this app you also need to consider things like EPG or different streams. So before you start using this app you also need to spend some time to learn so you can add these resources to the app for your experience. These operations will take very little time and you can complete them if you try your best. Televizo offers an application for managing different sources or channels, so in some cases it also includes the same elements as the movie applications. In particular, users can easily manage what they own. You can surf to find or use a magnifying glass. So it only takes a minute to find yoursCanal. These interfaces are also not completely fixed, but they can also be changed according to your preferences. This should be appreciated as it is useful for easily managing newly added channels. Observations vary depending on the number of channels. The app offers this valuable feature that makes it easy to sort and manage what you want, just like apps for listening to music. When it comes to the channel list, you see a lot; You feel that there are some you like and see, and others you barely touch. Thanks to this, the application also allows you to sort and delete certain channels. This is a task that the user performs from time to time to optimize the number of channels in the application. At the same time, it is also unavoidable when the number of channels increases and people just want to keep the few channels they need. At the same time, just like playlists, the application itself will have a list of channels added by the user, most of which are perfect for him. At the same time, this addition occurs quickly and is not limited in quantity. You can say that you can add anything you want. Users can add their favorite TV channels to the EPG to watch on their mobile devices as mentioned above. At the same time, this application fully supports some streams such as HLS, UDP and many others. So it's almost certain that the shows you like can find their way into this app, and then it's up to you to take the time to enjoy them. It is perfect for those who are rarely at home. It perfectly suits the entertainment needs of many different devices and can take it with you and open it at the same time to see if there is a connection. Therefore, in some cases, you have your free time even if you are not sitting in front of the TV screen, but still watch your favorite things out of habit. Download APK (8.22 MB) We have changed some download links to download Moddroid APK, you canTelevizo with faster download speed. The MODDROID app has richer content than MODDROID websites. Your comment (0) Post a comment Watch your provider's IPTV on your phone, tablet, TV or TV. The application is only a player and does not contain preset channels. You must add your provider's playlist and EPG to view them. Available features: - Live broadcasts and archives (if the playlist supports this feature); - You can add unlimited M3U or Xtream Codes playlists; - You can add an unlimited number of XML EPG; - Support for various streams (HLS, UDP, RTMP and others); - sorting and searching; - Parental control (playlist editor); - Choice; - Choice of audio track; - Choice of subtitles; - And much more... Enjoy watching! Pay attention to the Play Protect warning! As you know, MOD stands for Editing APK Files. Therefore, the MOD APK files do not match the version available on the Google Play Store. So now Play Protect will warn you when you want to install a MOD-APK. So, the best way is to completely disable Play Protect. this if you want to install and use the MOD APK. How to choose the correct version? Select the APK, APK, or XAPK icon version only if you want to download the original. If you want to download a MOD version, please select the version with the MOD icon. How to install Each version has its own installation method. That's why we have specific installation instructions for each version on the download page. How to download it? Just wait a few seconds and the download button will appear. Why is the download speed slow? The server we use is a high quality dedicated type that allows us to distribute large volumes of files to all users. That's why we make sure that APKMODY's download speed is as good as any other storage system. If the download speed is slow, check the bandwidth.
